

PrimApplier®

Wafer Dispenser

PrimApplier®

The PrimApplier is an automatic unit for the application of personalized edible wafer paper labels ('ouwel' in Dutch) onto bakery products.

Tracking and tracing of bakery products during the complete production process is becoming more and more a necessity.

Any useful information such as a bar code, production date or best before date can be printed with food grade inks onto the wafer paper label: the PrimApplier makes it possible to place the label automatically and efficient onto the product.

The edible labels also represent an ultimate marketing tool, showing the logo of the Bakery in which the products have been produced or communicating significant information to the consumer (specific ingredients, organic etc.).

By inserting the labels from its packing directly into the applicator cartridge avoiding manual contact, a maximum of hygiene is guaranteed.

Description/highlights;

The PrimApplier® is an electro pneumatically operated applicator, suitable for a wide range of wafers with the following characteristics:

- Fully automatic,
- Stand alone unit,
- No need for communication with conveying systems or/and other equipment,
- Integrated product detection,
- Easy installation above all kind of conveyor belts,
- Modular system, from one (1) to twenty (20) units on one portal frame,
- Hi flexibility on type of products,
- Low maintenance costs,
- Easy accessible for cleaning.

Options:

- Automatic wafer cartridge exchange,
- King size, odd shaped wafers,

Technical Specifications;

Capacity:

500 products / Hr.

Minimum product pitch:

> 225 mm

Minimum distance between products:

>120 mm

Minimum product mass:

> 300 gram.

Current:

230 Volt, 50 Hz.

Pneumatic pressure:

5 bar

Dimensions: (L x B x H)

660x220x650

Wafer cartridge capacity:

150-500

Wafer dimensions:

round < 35 mm
